PROFESSIONAL SUMMARY

Backend Developer / Software Engineer with hands-on experience building production-ready web applications, RESTful APIs, and payment systems (QRIS & Virtual Account). Strong in backend architecture, database design, and transaction handling to ensure data integrity and system reliability. Experienced in PHP (CodeIgniter 4, Flight) and PostgreSQL, with a focus on clean, maintainable, and scalable backend systems.

CORE SKILLS

- Backend Development
- RESTful API Design
- Payment Gateway Integration (QRIS, Virtual Account)
- Database Design & Optimization
- Transaction Handling & Data Integrity

TECHNICAL SKILLS

Programming Languages: PHP, Python, Golang

Frameworks: CodeIgniter 4, Flight, Flask, Gin

Database: PostgreSQL, MySQL, Oracle

Tools & Infrastructure: Git, Linux Server, Nginx

WORK EXPERIENCE

Backend Developer – PT DATA BUMI INDONESIA

2021 – Present

- Developed and maintained backend systems for regional tax (pajak daerah) applications used by local government entities.
- Built and integrated payment systems for tax transactions, ensuring accurate payment recording and status validation.
- Designed and managed relational databases to support tax data, payment records, and reporting requirements.
- Implemented RESTful APIs for communication between web applications and external payment services.
- Ensured data integrity and system reliability through proper transaction handling and error management.

PROJECT EXPERIENCE

Payment System API (QRIS & Virtual Account)

- REST API development, webhook handling, and transaction-safe payment flow.

Regional Tax Application

- Backend development, database design, and payment system integration.

EDUCATION

Education Level – Major

Universitas Muhammadiyah Jember

2015 - 2020
